

Mrs Karen Edwards

*Special Education, Learning Support,
Maths and Direct Instruction Maths*

Kedwa13@eq.edu.au

Qualifications:

Batchelor of Arts majoring in English and History
Graduate Diploma of Teaching
Batchelor of Education
Masters of Education/Leadership
Diploma of Counselling
Certificate IV Training and Assessing

At Calamvale Community College I have taught in both Junior and Senior Secondary School. My role at the College has been in the Special Education, Learning Support, Maths, and Science. In Senior School I taught Special Education and Maths. During my time in Middle School I have worked in Special Education and the Horizon Program with my focus areas Maths and Science. This program has enabled me to enhance my skills in Learning Support and develop a high level of expertise in Numeracy. My goals have always been to provide the highest level of teaching to all my students and to develop in them a love for learning and confidence in their ability to improve and succeed.

This year I will be teaching a new program, Direct Instruction. The purpose of the program is to engage and support students who require corrective numeracy skills in order to provide the opportunity to access the curriculum in all areas. This is a fast paced, research based program and I feel confident that there will be great improvements in their numeracy skills. I look forward to also supporting teachers and DI students in their core subjects
