

Mr Mark Tunstall

*Digital, Design Technology and
Vocational Education and Training*

Mtuns2@eq.edu.au

Qualifications:

Bachelor of technology Education,
Certificate in Engineering (Mechanical)
Cert IV Training and Assessment
Cert III Information, Digital Media and Technology

I am a Digital, Design Technology and Vocational Education and Training teacher with 16 years teaching experience. I have a background in trades (Landscaping as well as Fitting and Machining), local government administration and ICT (Information and Communication Technologies). I believe that education is an individual experience and focus on getting students to look at their personal goals and preferred futures to learn to apply their learning to achieve those goals and realise the futures they want. From experience I know that individuals' careers can take them down many paths and encourage students to develop the skills they will need to navigate through their career journey.
